FILTER HOUSING KITS

Boshart's filter housings are great for agriculture, water well, point of use, greenhouse/ drip irrigation, whole house residential and recreational vehicle applications. They have a threaded inlet and outlet with a relief button on the inlet side. These housings fit industry standard filter cartridges (not included). The filter heads have mounting bosses molded in for installation with a mounting bracket. Each unit comes with the housing, o-rings, filter bowl wrench, and a mounting bracket with hardware.

• Threads conform to ANSI/ASME B1.20.1

Part No.	Bowl Length	Inlet & Outlet Size	Quantity		List Price - A

GIANT FILTER HOUSINGS

Boshart's high temperature housings are great for alcohols, toluene, xylene, gasoline, hot water & liquids, photographic, salt water fisheries and vegetable oils. They are suitable for high pressure service and are an excellent alternative to stainless or carbon housings. These housings accept industry standard cartridges (not included).

- Glass reinforced nylon head & bowl
- Threads conform to ANSI/ASME B1.20.1

PLEATED POLYESTER CARTRIDGES

Boshart's polyester pleated filters are suited for a variety of uses and can be used in residential, commercial and industrial applications. The non-woven polyester filter media is pleated around a polypropylene core for added strength and stability. The pleated surface area provides greater sediment and dirt holding capacity while maintaining flow rate and reducing initial pressure drop.

These cartridges can be cleaned and reused in most applications and micron ratings.

The flow rates listed are based on their maximum efficiency. They can be used with flow rates above what is listed but will not filter as effectively.

Temperature Range: 40°F to 125°F (4°C to 52°C), Filter Media: Polyester

SPUN POLYPROPYLENE CARTRIDGES

Boshart's spun filter cartridges are manufactured with melt blown technology into a multi-layer structure to provide superior filter efficiency, reduced pressure drop and increased cartridge life. The standard specification meets most of the housings in the market. Gradient four layer (outside-in), varied micron rate filter structure to capture particles effectively and prolong cartridge life. Cartridge can achieve up to two times that of the double layers. Spun filters consist of 100% high purity polypropylene which is surfactant free, binder free and adhesive free. They have good chemical resistance and is not prone to bacterial attack.

The flow rates listed are based on their maximum efficiency. They can be used with flow rates above what is listed but will not filter as effectively.

• NSF/ANSI Standard 372 & 42

STRING WOUND POLYPROPYLENE CARTRIDGES

Boshart's string wound cartridges are for a wide range of filtering applications and are manufactured from FDA grade polypropylene. These cartridges are very suitable for potable water filtration. Ideal for removing very fine sediment right through to very coarse sediment, at ambient temperatures. The cartridges are made by diagonally winding a precise pattern of carefully selected fibers on a center core. The pattern is designed to create hundreds of identical, tapered, spiral passageways. During the winding, fibers are combed across the passage and locked in place by succeeding layers. Solid particles are removed by entrapment in this highly efficient filter media. Filtration takes place throughout the entire cartridge, not just on the surface, so large amounts of contaminant are trapped without a sudden rise in pressure caused by surface blinding. By varying the wind pattern, cartridges are fabricated to give a pre-determined micron rating.

CARBON BLOCK CARTRIDGES

Carbon block cartridges are ideal for point-of-use (POU) and Reverse Osmosis applications. These cartridges can be used in a wide range of applications such as residential, food service, commercial, and industrial. The carbon block series cartridges are great for displacing traditional granular activated carbon and powdered activated carbon filters in application where high chlorine reduction is needed. They are manufactured with high purity activated carbon and provide an exceptional cost-to-performance value. These cartridges have high chlorine reduction, great dirt-holding capacity, and greatly reduced carbon fines.

• NSF/ANSI Standard 372 & 42

CARBON BRIQUETTE 'CYST REMOVAL' CARTRIDGES

Boshart's carbon briquette cyst removal cartridges are designed for highly effective filtration of water for certain volatile organic chemicals such as toluene and xylene. They are effective for pesticides, chlorine, taste and odour and sediment reduction down to 0.5 micron, making them an excellent polishing filter or pre-filter in applications that require fine filtration. These cartridges are excellent at reducing 99.9% of giardia and cryptosporidium cysts from potable drinking water making them ideal for potable water filtration and many industrial, commercial and food service applications. Carbon briquette cyst removal cartridges are designed as a polishing filter, they are recommended to be installed in conjunction with a pre-filter to remove sediment.

Removal of sediment prior to contact with a finishing cartridge prevents the finishing cartridge from plugging prematurely due to sediment entrapment long before the maximum utilization of the carbon has been achieved

GRANULAR ACTIVATED CARBON CARTRIDGES

Boshart's granular activated carbon cartridges are designed to remove unpleasant tastes and odours to produce better tasting water. They have a low pressure drop, durable physical strength and steady flow to achieve reliable performance. Suitable for reverse osmosis system or water dispensing system in residential, commercial and industrial applications.

• NSF/ANSI Standard 372

POWDER ACTIVATED CARBON WRAP CARTRIDGES

Boshart's powder activated carbon wrap cartridges are a dual-purpose cartridge to reduce bad taste & odor, chlorine taste & odor, and fine particles or sediment. They have good dirt holding capacity and high flow rates making them an economical cartridge for a wide range of applications. Constructed of carbon impregnated cellulose media, with a polypropylene netting to provide additional strength.

ICEMAKER / IN-LINE TASTE & ODOUR FILTERS

Boshart's icemaker / in-line taste and odour cartridges utilize coconut shell granular activated carbon and are designed to remove unpleasant tastes and odours as well as sediment to produce cleaner, clearer, better tasting water. They have a low pressure drop, high dirt holding capacity, durable physical strength, and steady flow to achieve reliable performance and long life usage. By packing the carbon the concerns of shifting carbon inside the filter are removed. These Granular Activated Carbon filters are easily installed on the water line to an automatic icemaker, reverse osmosis system or water dispensing system. Cartridges are manufactured in compliance with NSF and FDA requirement in material, media and processing.

• NSF/ANSI Standard 372

SEDIMENT FILTER & SEPARATOR REPLACEMENT PARTS

These replacement parts are for the 14SFHK series sediment filters & separators. Purge valve is available, part number 0929-05.

Part No.	Size	Description	Quantity		List Price - A
			L1	L2	
List Price Effective: April 15, 2022					
Filter Head					
14SF-FH10-BII	1"	For 1" filter & separator	75		\$ 26.94
14SF-FH15-BII	1-1/2"	For 1-1/2" filters & separators	35		\$ 28.87
14SF-FH20-BII	2"	For 2" filter & separator	20		\$ 47.25
Filter Bowl					
14SF-FB10		For 1" filter			\$ 27.65
14SF-FB10XS		For 1" Separator	60		\$ 46.69
14SF-FB15		For 1-1/2" filter & separator	40		\$ 38.85
14SF-FB20		For 2" filter & separator	20		\$ 60.99
O-Ring Kit					
14SF-ORK10		For 1" filter & separator			\$ 4.55
14SF-ORK15		For 1-1/2" filter & separator			\$ 5.19
14SF-ORK20		For 2" filter & separator			\$ 5.64
Mounting Bracket Kit					
14SF-MBK		For 1-1/2", 2" filter & separator - bracket with hardware	80		\$ 10.87
14SF-MCK10		For 1" filter & separator - 2 clamps with hardware			\$ 9.16
